Due to COVID 19 the
school has focused on
academics and not extra
mural activities, there a
currently limited extra
mural activities.

Welcome 2022

We welcome all our students back this year and we would like to congratulate the class of 2021 for increasing the pass rate by 13%.

Our school had a 55.4 % pass rate in 2021, with a total of 175 learners that wrote and a total of 97 learners that passed.

The breakdown of the results:

44.3% bachelors

27 % diploma

27 % certificate

Let us all start from the first day of school and work hard to achieve in our academics and growth as a school.

May God bless each and everyone during this coming year.

Learner Support

Ms Naki is our learner support and also a past student of Toise SSS. This is Ms Naki's story:

I am a young enthusiastic lady that love working with people and loves to help people achieve success.

I am a outgoing person that loves to with groups of individuls.

In 2019 In the heart of all the challenges of life and Covid19 I became a volunteer at Toise and assist in the computer lab. I understand the importance of technology as I a former student was given the tools by Sifunda Kunye Educational project's in 2011 through Computer literacy course to know the basic computer skills I needed.

I am currently volunteering my time in the lab to assist and equip learners with the same skills that was a life changer when it came to technology in my life.

My main role at school is a learner support agent, I deal mainly with learner behavior and life in general.

My purpose is to fulfill my duties and volunteer in our school lab to help learners in anyway I can.

My confidence with computers was directly impacted by Sifunda Kunye Educational project. Toise SSS is my past High school and my passion for education and our youth started here. I am grateful do be part of Toise SSS and Sifunda Kunye project.

Sportsday 2022

18 February 2022

Our school kicked off sport after months of sports not being played due to lockdown relating to COVID 19. Sports kicked off with teachers versus teams and all parties had fun. It was a fun day for all, everyone missed sports and everyone made best of the day..

Lab Facilitator

21 September 2021

Thandile Mazukwe is our Sifunda Kunye lab facilitator at our school for the past three years. Thandile works as a volunteer for all Sifunda Kunye schools when it comes to The Presidents Awards and have supported hundreds of learners from all schools to complete levels in this program.

During his free time Thandile runs a NPO rugby team the dragons, and he has helped many young rugby players achieve goals and further their education.

Thandile worked hard and was able to receive funding from the National Lottery to buy new jerseys and rugby equipment.

Thandile thank you for the work you do for our youth, thank you for believing in pushing our youth and guiding them both in the computer lab and the sport field.

FRIDAY 17 SEPTEMBER 2021 THE BUGLE 11

Local rugby club benefits from SA National Lottery

UNIFORMITY: Zwelitha Development Rugby Club gains from a successful SA National Lottery donation and displays the new kit and equipment at the Zwelitha Park over the weekend. **INSET:** Head Coach Thandile Mazukwe addresses the team during the event.

The Zwelitha Development Rugby club has benefitted immensely after becoming the recipients of a kind and generous donation from the South African National Lottery (SANL) last week. There was excitement, joy and happiness as players and members of the 'Dragons' as they are affectionately known displayed their new kit and equipment, sanitizers and track suits with sport bags at the Zwelitha Park over the weekend.

A special occasion was held where club executive members, coaches, players and parents with members of the Buffalo City Metropolitan Sports Council also in attendance.

I am in the moon and the club chairperson Magloza will also treasure this day that the Lord has answered our prayers through SANL.

Owethu Thobisi is the team manager and was also ecstatic about the contribution made possible by SANL.

"This donation is really awesome, much-needed and it will uplift the spirit of everyone in the club," said Thobisi, adding they are indeed grateful for the contribution of SANL.

Club head coach Thandile Mazukwe echoed his team manager's sentiments that the contribution will indeed uplift the spirit of everyone and most especially the players.

"I think this contribution will open many more doors and opportunities in the future as well as to attract more players to the club," said Mazukwe.

BCM Sports Council 3rd vice president Nomsa Ngenyema during her speech congratulated the club on the new season, advised and motivated the executive and players to appreciate it.

"This is awesome, you look stunning and I can see the abundance of smiles on your faces but you have to treasure it, look after it and appreciate it as it will assist the club tremendously in going forward," said Ngenyema.

She then turns her topic to the players where she encouraged them to have respect, to be disciplined and to concentrate on their education as well.

"Respect your parents, respect your coaches, executive and teammates and always remember to be disciplined that is on the field as well as off the field as respect goes a long way. Education is the key to success, so study and do not only focus on your sporting coach as it is a short term career," said Ngenyema.

SECURITEC

Sifunda Kunye computer lab at our school follows a caps aligned software program Cami. The program helps learners with English and mathe-
matic skills.

The lab is also fully equipped with the internet that provides learners with the opportunity to access the internet for research, application to uni-
versity and much more. Toise SSS are lucky to be connected to a fully functional lab, the lab assist our learners to connected to the outside
world as many rural school in South Africa does not have the same opportunity.

Sifunda Kunye computer lab that is fully supported by full time Sifunda Kunye employees. Our computer lab creates great opportunity of comput-
er literacy and assistance to many learners.

The use of technology is extremely important in todays life and our teachers and faculty is grateful to be one of the partner schools of Sifunda
Kunye.
